

November 02, 2025: On the Continuing Stalking Presence of Donald Trump and Elon Musk Technologies

I am taking time out of my important work now to write a factual recording of the continuous stalking presence and intrusive spying campaign of a malicious group of people that are continuing to act on behalf of Donald Trump and Elon Musk.

While working in my back yard, I am being subjected to an ongoing use of vehicles and machine noises near our home to instill upon my life the ongoing and continuous impression that I am being watched in every movement that I make and that 'they' / 'it' and their 'gang' of criminals are 'matching me' at 'every turn'.

This is an ongoing intrusion into my Homelife - in my own back yard that has continued since before we originally left the country.

In fact, I have offered definitive proof of this use of vehicles to match my movements in my backyard to the United States Secret Service and we have received no response, no outreach, no replies of any sort from any of the numerous government agencies that we contacted to address this malicious use of the spy state to wage a war against our home here in America.

As I have previously expressed, I am voting 'No Confidence' in the police of our community, state, and nation. I am recording that I am still experiencing the exact same type of malicious spy campaign that I experienced before I reached out to every law enforcement agency and every political group that I could think of to seek help for this ongoing problem.

I have no choice but to conclude that Donald Trump is operating a completely criminal form of government and that he is acting as the face of a military coup de tat that has already taken over the United States of America.

You read it here first. I have been expressing this for a very long time now. The United States Military is operating completely outside of the law and is continuing to find funding, missions, ambitions, and resources despite the government being shut down, the legislature calling their missions 'extra-judicial killings' (murders) and the like.

We are in serious need of accountability to the United State Military, the National surveillance state, and all of the offices that are operating out of the Pentagon.

For the record, I don't care what label they put on to the people that they are allegedly 'protecting' today - even Christians in Nigeria.

The USA Military is operating well outside of the law and must be starved of their resources in order to bring them to heel with the American legislature and judicial branch.

If Donald Trump continues to find private funding for this unlawful coup de tat, then I am strongly advising each member of the government to consider his operation to be squarely within the definition of an illegal military coup de tat wherein Donald Trump is attempting to buy and run his own military.

This is extremely dangerous and is not something that I am writing without hard proof of living through this nightmare every single day for several years now.
